# Product datasheet for RC205339L2

#### SEPT4 (SEPTIN4) (NM\_080416) Human Tagged Lenti ORF Clone

### **Product data:**

| Product Type:                | Expression Plasmids  |
|------------------------------|--|
| Product Name:                | SEPT4 (SEPTIN4) (NM_080416) Human Tagged Lenti ORF Clone                                 |
| Tag:                         | mGFP   |
| Symbol:                      | SEPTIN4  |
| Synonyms:                    | ARTS; BRADEION; C17orf47; CE5B3; H5; hCDCREL-2; hucep-7; MART; PNUTL2; SEP4; SEPT4       |
| Mammalian Cell<br>Selection: | None   |
| Vector:                      | pLenti-C-mGFP (PS100071)   |
| E. coli Selection:           | Chloramphenicol (34 ug/mL)   |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC205339).                           |
| <b>Restriction Sites:</b>    | Sgfl-Mlul  |
| Cloning Scheme:              |  |
|                              | Cloning sites used for ORF Shuttling:<br>Sgf 1 ORF Mlu I<br>GCG ATC GC ATG// NNN ACG CGT |

ACCN: ORF Size: NM\_080416 1377 bp

| SEPT4 (SEPTIN4) (NM_080416) Human Tagged Lenti ORF Clone – RC205339L2 |   |
|---|---|
| OTI Disclaimer:   | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>   |
| OTI Annotation:   | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| Components:   | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).  |
| Reconstitution Method:  | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>  |
| RefSeq:   | <u>NM 080416.1</u>  |
| RefSeq Size:  | 1669 bp   |
| RefSeq ORF:   | 1380 bp   |
| Locus ID:   | 5414  |
| UniProt ID:   | <u>043236</u>   |
| Cytogenetics:   | 17q22   |
| Domains:  | GTP_CDC   |
| MW:   | 52.9 kDa  |
| Gene Summary:   | This gene is a member of the septin family of nucleotide binding proteins, originally described<br>in yeast as cell division cycle regulatory proteins. Septins are highly conserved in yeast,<br>Drosophila, and mouse, and appear to regulate cytoskeletal organization. Disruption of<br>septin function disturbs cytokinesis and results in large multinucleate or polyploid cells. This<br>gene is highly expressed in brain and heart. Alternatively spliced transcript variants encoding<br>different isoforms have been described for this gene. One of the isoforms (known as ARTS) is |

distinct; it is localized to the mitochondria, and has a role in apoptosis and cancer. [provided
