#### GAPDHS (NM\_014364) Human Tagged Lenti ORF Clone - RC205362L4

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 014364.3</u>

 RefSeq Size:
 1492 bp

 RefSeq ORF:
 1227 bp

 Locus ID:
 26330

 UniProt ID:

**Protein Families:** Druggable Genome

MW: 44.5 kDa

**Gene Summary:** This gene encodes a protein belonging to the glyceraldehyde-3-phosphate dehydrogenase

family of enzymes that play an important role in carbohydrate metabolism. Like its somatic

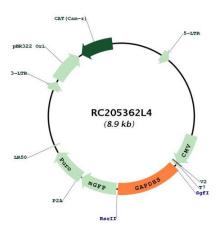

cell counterpart, this sperm-specific enzyme functions in a nicotinamide adenine

dinucleotide-dependent manner to remove hydrogen and add phosphate to glyceraldehyde 3-phosphate to form 1,3-diphosphoglycerate. During spermiogenesis, this enzyme may play an important role in regulating the switch between different energy-producing pathways, and

it is required for sperm motility and male fertility. [provided by RefSeq, Jul 2008]
