

### Product datasheet for RC205689L3

# ict datasileet for Re203089E3

KIN (NM\_012311) Human Tagged Lenti ORF Clone

#### **Product data:**

**Product Type:** Expression Plasmids

Product Name: KIN (NM\_012311) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: KIN

Synonyms: BTCD; KIN17; Rts2

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC205689).

Sequence:

Restriction Sites: Sgfl-Mlul

**Cloning Scheme:** 

 $<sup>\</sup>ensuremath{^*}$  The last codon before the Stop codon of the ORF.

**ACCN:** NM\_012311

ORF Size: 1179 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

#### KIN (NM\_012311) Human Tagged Lenti ORF Clone - RC205689L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 012311.2</u>

 RefSeq Size:
 6401 bp

 RefSeq ORF:
 1182 bp

 Locus ID:
 22944

 UniProt ID:
 060870

Cytogenetics: 10p14

Domains: KOW

**MW:** 45.4 kDa

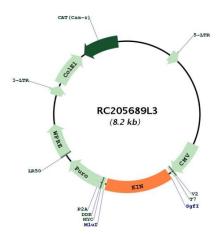

**Gene Summary:** The protein encoded by this gene is a nuclear protein that forms intranuclear foci during

proliferation and is redistributed in the nucleoplasm during the cell cycle. Short-wave ultraviolet light provokes the relocalization of the protein, suggesting its participation in the cellular response to DNA damage. Originally selected based on protein-binding with RecA antibodies, the mouse protein presents a limited similarity with a functional domain of the bacterial RecA protein, a characteristic shared by this human ortholog. Alternative splicing of

this gene results in multiple transcript variants. [provided by RefSeq, Jan 2012]
