

Product datasheet for RC206047L1

CBLB (NM_170662) Human Tagged Lenti ORF Clone

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

| Product Type: | Expression Plasmids |
|------------------------------|---|
| Product Name: | CBLB (NM_170662) Human Tagged Lenti ORF Clone |
| Tag: | Myc-DDK |
| Symbol: | CBLB |
| Synonyms: | Cbl-b; Nbla00127; RNF56 |
| Mammalian Cell Selection: | None |
| Vector: | pLenti-C-Myc-DDK (PS100064) |
| E. coli Selection: | Chloramphenicol (34 ug/mL) |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC206047). |
| Restriction Sites: | SgfI-RsrII |
| Cloning Scheme: | |
| | Cloning sites used for ORF Shuttling: Sgf I ORF Rsr II [GCG ATC GC]C ATG // NNN AG[C GGA CCG] |

* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM_170662 2946 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

|--|--|
| OTI Disclaimer: | Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery. |
| | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| Components: | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water). |
| Reconstitution Metho | d: 1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. |
| RefSeq: | <u>NM 170662.3</u> |
| RefSeq Size: | 3976 bp |
| RefSeq ORF: | 2949 bp |
| Locus ID: | 868 |
| UniProt ID: | <u>Q13191</u> |
| Cytogenetics: | 3q13.11 |
| Protein Families: | Druggable Genome |
| Protein Pathways: | Chronic myeloid leukemia, Endocytosis, ErbB signaling pathway, Insulin signaling pathway, Jak-STAT signaling pathway, Pathways in cancer, T cell receptor signaling pathway, Ubiquitin mediated proteolysis |
| MW: | 109.4 kDa |

SCRIGENE CBLB (NM_170662) Human Tagged Lenti ORF Clone – RC206047L1

Gene Summary:This gene encodes an E3 ubiquitin-protein ligase which promotes proteosome-mediated
protein degradation by transferring ubiquitin from an E2 ubiquitin-conjugating enzyme to a
substrate. The encoded protein is involved in the regulation of immune response by limiting
T-cell receptor, B-cell receptor, and high affinity immunoglobulin epsilon receptor activation.
Studies in mouse suggest that this gene is involved in antifungal host defense and that its
inhibition leads to increased fungal killing. Manipulation of this gene may be beneficial in
implementing immunotherapies for a variety of conditions, including cancer, autoimmune
diseases, allergies, and infections. [provided by RefSeq, Sep 2017]
