Gene Summary:This gene encodes a serine/threonine protein kinase that contains a ubiquitin-associated<br/>(UBA) domain. The encoded protein is a member of the adenosine monophosphate-activated<br/>kinase (AMPK) subfamily of kinases that play a role in conserved signal transduction<br/>pathways. A mutation in this gene is associated with early infantile epileptic encephalopathy<br/>30. [provided by RefSeq, Nov 2016]
