Product datasheet for RC206235L3V

Silencer of Death Domain (BAG4) (NM_004874) Human Tagged ORF Clone Lentiviral Particle

Product data:

| Product Type: | Lentiviral Particles |
|------------------------------|---|
| Product Name: | Silencer of Death Domain (BAG4) (NM_004874) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | Silencer of Death Domain |
| Synonyms: | BAG-4; SODD |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-Myc-DDK-P2A-Puro (PS100092) |
| Tag: | Myc-DDK |
| ACCN: | NM_004874 |
| ORF Size: | 1371 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC206235). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | <u>NM 004874.2</u> |
| RefSeq Size: | 4478 bp |
| RefSeq ORF: | 1374 bp |
| Locus ID: | 9530 |
| UniProt ID: | <u>095429</u> |
| Cytogenetics: | 8p11.23 |
| Domains: | BAG |
| Protein Families: | Druggable Genome |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| | Silencer of Death Domain (BAG4) (NM_004874) Human Tagged ORF Clone Lentiviral Particle – RC206235L3V |
|---------------|---|
| MW: | 49.6 kDa |
| Gene Summary: | The protein encoded by this gene is a member of the BAG1-related protein family. BAG1 is an anti-apoptotic protein that functions through interactions with a variety of cell apoptosis and growth related proteins including BCL-2, Raf-protein kinase, steroid hormone receptors, growth factor receptors and members of the heat shock protein 70 kDa family. This protein contains a BAG domain near the C-terminus, which could bind and inhibit the chaperone activity of Hsc70/Hsp70. This protein was found to be associated with the death domain of tumor necrosis factor receptor type 1 (TNF-R1) and death receptor-3 (DR3), and thereby negatively regulates downstream cell death signaling. The regulatory role of this protein in cell death was demonstrated in epithelial cells which undergo apoptosis while integrin mediated matrix contacts are lost. Alternatively spliced transcript variants encoding distinct isoforms have been identified. [provided by RefSeq, Mar 2011] |
