

Product datasheet for RC206489L1V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

CHST15 (NM_015892) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: CHST15 (NM_015892) Human Tagged ORF Clone Lentiviral Particle

Symbol: CHST15

Synonyms: BRAG; GALNAC4S-6ST

Mammalian Cell

Selection:

None

Vector: pLenti-C-Myc-DDK (PS100064)

Tag: Myc-DDK
ACCN: NM 015892

ORF Size: 1683 bp

ORF Nucleotide

Sequence:
OTI Disclaimer:

The ORF insert of this clone is exactly the same as (RC206489).

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 015892.2

 RefSeq Size:
 4813 bp

 RefSeq ORF:
 1686 bp

 Locus ID:
 51363

 UniProt ID:
 Q7LFX5

 Cytogenetics:
 10q26.13

Domains: Sulfotransfer

Protein Families: Transmembrane

CHST15 (NM_015892) Human Tagged ORF Clone Lentiviral Particle - RC206489L1V

Protein Pathways: Chondroitin sulfate biosynthesis

MW: 64.9 kDa

Gene Summary: Chondroitin sulfate (CS) is a glycosaminoglycan which is an important structural component

of the extracellular matrix and which links to proteins to form proteoglycans. Chondroitin sulfate E (CS-E) is an isomer of chondroitin sulfate in which the C-4 and C-6 hydroxyl groups are sulfated. This gene encodes a type II transmembrane glycoprotein that acts as a sulfotransferase to transfer sulfate to the C-6 hydroxal group of chondroitin sulfate. This gene has also been identified as being co-expressed with RAG1 in B-cells and as potentially acting as a B-cell surface signaling receptor. Alternative splicing results in multiple transcript

variants encoding distinct isoforms. [provided by RefSeq, Jul 2012]
