

## Product datasheet for RC206489L3V

## OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

## CHST15 (NM\_015892) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** CHST15 (NM\_015892) Human Tagged ORF Clone Lentiviral Particle

Symbol: CHST15

Synonyms: BRAG; GALNAC4S-6ST

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

 Tag:
 Myc-DDK

 ACCN:
 NM\_015892

ORF Size: 1683 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC206489).

Sequence:
OTI Disclaimer:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 015892.2

RefSeq Size: 4813 bp
RefSeq ORF: 1686 bp
Locus ID: 51363
UniProt ID: Q7LFX5
Cytogenetics: 10q26.13
Domains: Sulfotransfer

Domains.

**Protein Families:** Transmembrane

## CHST15 (NM\_015892) Human Tagged ORF Clone Lentiviral Particle - RC206489L3V

**Protein Pathways:** Chondroitin sulfate biosynthesis

MW: 64.9 kDa

**Gene Summary:** Chondroitin sulfate (CS) is a glycosaminoglycan which is an important structural component

of the extracellular matrix and which links to proteins to form proteoglycans. Chondroitin sulfate E (CS-E) is an isomer of chondroitin sulfate in which the C-4 and C-6 hydroxyl groups are sulfated. This gene encodes a type II transmembrane glycoprotein that acts as a sulfotransferase to transfer sulfate to the C-6 hydroxal group of chondroitin sulfate. This gene has also been identified as being co-expressed with RAG1 in B-cells and as potentially acting as a B-cell surface signaling receptor. Alternative splicing results in multiple transcript

variants encoding distinct isoforms. [provided by RefSeq, Jul 2012]
