

### Product datasheet for RC206496L1

# CISH (NM\_145071) Human Tagged Lenti ORF Clone

#### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** CISH (NM\_145071) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: CISH

Synonyms: BACTS2; CIS; CIS-1; G18; SOCS

Mammalian Cell None

Selection:

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC206496).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

 $<sup>\</sup>ensuremath{^*}$  The last codon before the Stop codon of the ORF.

**ACCN:** NM\_145071

ORF Size: 774 bp

#### CISH (NM\_145071) Human Tagged Lenti ORF Clone - RC206496L1

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 145071.1</u>

**RefSeq Size:** 2035 bp **RefSeq ORF:** 777 bp

Locus ID: 1154

UniProt ID: Q9NSE2

Cytogenetics: 3p21.2

**Domains:** SH2, SOCS

**Protein Families:** Druggable Genome

**Protein Pathways:** Jak-STAT signaling pathway

MW: 28.5 kDa

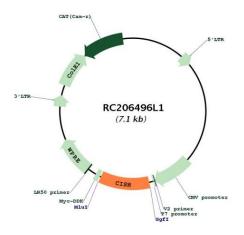

**Gene Summary:** The protein encoded by this gene contains a SH2 domain and a SOCS box domain. The

protein thus belongs to the cytokine-induced STAT inhibitor (CIS), also known as suppressor of cytokine signaling (SOCS) or STAT-induced STAT inhibitor (SSI), protein family. CIS family members are known to be cytokine-inducible negative regulators of cytokine signaling. The expression of this gene can be induced by IL2, IL3, GM-CSF and EPO in hematopoietic cells. Proteasome-mediated degradation of this protein has been shown to be involved in the inactivation of the erythropoietin receptor. Multiple transcript variants encoding different

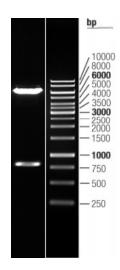

isoforms have been found for this gene. [provided by RefSeq, Aug 2008]
