Exodus 2 (CCL21) (NM_002989) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Exodus 2 (CCL21) (NM_002989) Human Tagged Lenti ORF Clone

Tag: Myc-DDK
Symbol: Exodus 2

Synonyms: 6Ckine; CKb9; ECL; SCYA21; SLC; TCA4

Mammalian Cell None

Selection:

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC206579).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_002989

ORF Size: 402 bp

Exodus 2 (CCL21) (NM_002989) Human Tagged Lenti ORF Clone - RC206579L1

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

Note: Plasmids are not sterile. For experiments where strict sterility is required, filtration with

0.22um filter is required.

RefSeq: <u>NM 002989.2</u>

 RefSeq Size:
 913 bp

 RefSeq ORF:
 405 bp

 Locus ID:
 6366

 UniProt ID:
 000585

Protein Families: Druggable Genome, Secreted Protein

9p13.3

Protein Pathways: Chemokine signaling pathway, Cytokine-cytokine receptor interaction

MW: 14.6 kDa

Cytogenetics:

Gene Summary: This antimicrobial gene is one of several CC cytokine genes clustered on the p-arm of

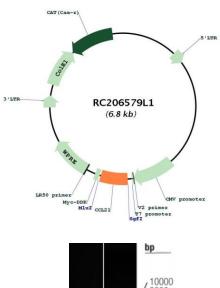

chromosome 9. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The CC cytokines are proteins characterized by two adjacent cysteines. Similar to other chemokines the protein encoded by this gene inhibits hemopoiesis and stimulates chemotaxis. This protein is chemotactic in vitro for thymocytes and activated T cells, but not for B cells, macrophages, or neutrophils. The cytokine encoded by this gene may also play a role in mediating homing of lymphocytes to secondary lymphoid organs. It is a high affinity functional ligand for chemokine receptor 7 that is expressed on T and B

lymphocytes and a known receptor for another member of the cytokine family (small

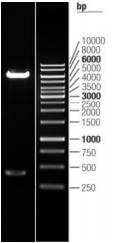

inducible cytokine A19). [provided by RefSeq, Sep 2014]
