

Product datasheet for **RC207130L4V**

COG7 (NM_153603) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Type: | Lentiviral Particles |
| Product Name: | COG7 (NM_153603) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | COG7 |
| Synonyms: | CDG2E |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-mGFP-P2A-Puro (PS100093) |
| Tag: | mGFP |
| ACCN: | NM_153603 |
| ORF Size: | 2310 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC207130). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_153603.1 |
| RefSeq Size: | 2943 bp |
| RefSeq ORF: | 2313 bp |
| Locus ID: | 91949 |
| UniProt ID: | P83436 |
| Cytogenetics: | 16p12.2 |
| MW: | 86.3 kDa |

Gene Summary:

The protein encoded by this gene resides in the golgi, and constitutes one of the 8 subunits of the conserved oligomeric Golgi (COG) complex, which is required for normal golgi morphology and localization. Mutations in this gene are associated with the congenital disorder of glycosylation type IIe.[provided by RefSeq, May 2010]
