Cryptochrome I (CRY1) (NM 004075) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Cryptochrome I (CRY1) (NM_004075) Human Tagged ORF Clone Lentiviral Particle

Symbol: Cryptochrome I

Synonyms: DSPD; PHLL1

Mammalian Cell

Selection:

None

Vector: pLenti-C-mGFP (PS100071)

Tag: mGFP

ACCN: NM_004075 **ORF Size:** 1758 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC207152).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 004075.2

 RefSeq Size:
 3310 bp

 RefSeq ORF:
 1761 bp

 Locus ID:
 1407

 UniProt ID:
 Q16526

Cytogenetics: 12q23.3

Domains: FAD_binding_7, DNA_photolyase

Protein Families: Druggable Genome

Protein Pathways: Circadian rhythm - mammal

MW: 66.4 kDa

Gene Summary: This gene encodes a flavin adenine dinucleotide-binding protein that is a key component of

the circadian core oscillator complex, which regulates the circadian clock. This gene is upregulated by CLOCK/ARNTL heterodimers but then represses this upregulation in a feedback loop using PER/CRY heterodimers to interact with CLOCK/ARNTL. Polymorphisms in this gene have been associated with altered sleep patterns. The encoded protein is widely conserved across plants and animals. Loss of the related gene in mouse results in a shortened circadian cycle in complete darkness. [provided by RefSeq, Jan 2014]
