# Product datasheet for RC207432L4

## Cytochrome P450 3A5 (CYP3A5) (NM\_000777) Human Tagged Lenti ORF Clone

### **Product data:**

Product Type:	Expression Plasmids
Product Name:	Cytochrome P450 3A5 (CYP3A5) (NM_000777) Human Tagged Lenti ORF Clone
Tag:	mGFP
Symbol:	Cytochrome P450 3A5
Synonyms:	CP35; CYPIIIA5; P450PCN3; PCN3
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC207432).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I         ORF         Mlu I            GCG ATC GCC         ATG//         NNN         ACG CGT

ACCN: ORF Size: NM\_000777 1506 bp

	chrome P450 3A5 (CYP3A5) (NM_000777) Human Tagged Lenti ORF Clone – RC207432L4
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 000777.2</u>
RefSeq Size:	1755 bp
RefSeq ORF:	1509 bp
Locus ID:	1577
UniProt ID:	<u>P20815</u>
Cytogenetics:	7q22.1
Domains:	p450
Protein Families:	Druggable Genome, P450, Transmembrane
Protein Pathways:	Drug metabolism - cytochrome P450, Drug metabolism - other enzymes, Linoleic acid metabolism, Metabolic pathways, Metabolism of xenobiotics by cytochrome P450, Retinol metabolism
MW:	57.1 kDa

### Stochrome P450 3A5 (CYP3A5) (NM\_000777) Human Tagged Lenti ORF Clone – RC207432L4 Cytochrome P450 3A5 (CYP3A5) (NM\_000777) Human Tagged Lenti ORF Clone – RC207432L4

# Gene Summary:This gene encodes a member of the cytochrome P450 superfamily of enzymes. The<br/>cytochrome P450 proteins are monooxygenases which catalyze many reactions involved in<br/>drug metabolism and synthesis of cholesterol, steroids and other lipids. The encoded protein<br/>metabolizes drugs as well as the steroid hormones testosterone and progesterone. This gene<br/>is part of a cluster of cytochrome P450 genes on chromosome 7q21.1. Two pseudogenes of<br/>this gene have been identified within this cluster on chromosome 7. Expression of this gene is<br/>widely variable among populations, and a single nucleotide polymorphism that affects<br/>transcript splicing has been associated with susceptibility to hypertensions. Alternative<br/>splicing results in multiple transcript variants. [provided by RefSeq, Apr 2014]
