

# Product datasheet for RC207434L1

## FGF1 (NM\_000800) Human Tagged Lenti ORF Clone

### **Product data:**

#### **Product Type: Expression Plasmids Product Name:** FGF1 (NM\_000800) Human Tagged Lenti ORF Clone Tag: Myc-DDK Symbol: FGF1 AFGF; ECGF; ECGF-beta; ECGFA; ECGFB; FGF-1; FGF-alpha; FGFA; GLIO703; HBGF-1; HBGF1 Synonyms: Mammalian Cell None Selection: Vector: pLenti-C-Myc-DDK (PS100064) E. coli Selection: Chloramphenicol (34 ug/mL) The ORF insert of this clone is exactly the same as(RC207434). **ORF** Nucleotide Sequence: **Restriction Sites:** Sgfl-Mlul **Cloning Scheme:** Cloning sites used for ORF Shuttling: ORF Sqf I Mlu I --- GCG ATC GC C ATG --- //--- NNN ACG CGT ---

ACCN: ORF Size: NM\_000800 465 bp

|                    | GF1 (NM_000800) Human Tagged Lenti ORF Clone – RC207434L1  |
|--------------------|--|
| OTI Disclaimer:    | Due to the inherent nature of this plasmid, standard methods to replicate additional amounts<br>of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore,<br>OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts<br>of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a<br>reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by<br>calling 301.340.3188 option 3 for pricing and delivery. |
|                    | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>  |
| OTI Annotation:    | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:        | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Met | <ul> <li>hod: 1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>   |
| RefSeq:            | <u>NM 000800.2</u>   |
| RefSeq Size:       | 4162 bp  |
| RefSeq ORF:        | 468 bp   |
| Locus ID:          | 2246   |
| UniProt ID:        | <u>P05230</u>  |
| Cytogenetics:      | 5q31.3   |
| Domains:           | FGF  |
| Protein Families:  | Druggable Genome, Secreted Protein   |
| Protein Pathways:  | MAPK signaling pathway, Melanoma, Pathways in cancer, Regulation of actin cytoskeleton   |
| MW:                | 17.5 kDa   |

### GRIGENE FGF1 (NM\_000800) Human Tagged Lenti ORF Clone – RC207434L1

Gene Summary:The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family.<br/>FGF family members possess broad mitogenic and cell survival activities, and are involved in<br/>a variety of biological processes, including embryonic development, cell growth,<br/>morphogenesis, tissue repair, tumor growth and invasion. This protein functions as a<br/>modifier of endothelial cell migration and proliferation, as well as an angiogenic factor. It acts<br/>as a mitogen for a variety of mesoderm- and neuroectoderm-derived cells in vitro, thus is<br/>thought to be involved in organogenesis. Multiple alternatively spliced variants encoding<br/>different isoforms have been described. [provided by RefSeq, Jan 2009]
