Product datasheet for RC207592L2V

liver FABP (FABP1) (NM_001443) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type:	Lentiviral Particles
Product Name:	liver FABP (FABP1) (NM_001443) Human Tagged ORF Clone Lentiviral Particle
Symbol:	liver FABP
Synonyms:	FABPL; L-FABP
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
Tag:	mGFP
ACCN:	NM_001443
ORF Size:	381 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC207592).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 001443.1</u>
RefSeq Size:	598 bp
RefSeq ORF:	384 bp
Locus ID:	2168
UniProt ID:	<u>P07148</u>
Cytogenetics:	2p11.2
Domains:	lipocalin
Protein Pathways:	PPAR signaling pathway

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	liver FABP (FABP1) (NM_001443) Human Tagged ORF Clone Lentiviral Particle – RC207592L2V
MW:	14.2 kDa
Gene Summary:	This gene encodes the fatty acid binding protein found in liver. Fatty acid binding proteins are a family of small, highly conserved, cytoplasmic proteins that bind long-chain fatty acids and other hydrophobic ligands. This protein and FABP6 (the ileal fatty acid binding protein) are also able to bind bile acids. It is thought that FABPs roles include fatty acid uptake, transport, and metabolism. [provided by RefSeq, Mar 2011]
