

Product datasheet for RC207595L1

TULP3 (NM_003324) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: TULP3 (NM 003324) Human Tagged Lenti ORF Clone

Tag:Myc-DDKSymbol:TULP3Synonyms:TUBL3

Mammalian Cell

Selection:

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

None

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC207595).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

st The last codon before the Stop codon of the ORF.

ACCN: NM_003324

ORF Size: 1326 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

OTI Disclaimer:

Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at customercom or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info

OTI Annotation:

This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

Components:

The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

- 1. Centrifuge at 5,000xg for 5min.
- 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
- 3. Close the tube and incubate for 10 minutes at room temperature.
- 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
- 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: <u>NM 003324.3</u>

 RefSeq Size:
 3106 bp

 RefSeq ORF:
 1329 bp

 Locus ID:
 7289

 UniProt ID:
 075386

 Cytogenetics:
 12p13.33

Domains: Tub

Protein Families: Druggable Genome, Transcription Factors

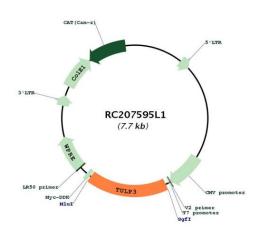

MW: 49.7 kDa

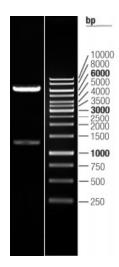

Gene Summary:

This gene encodes a member of the tubby gene family of bipartite transcription factors. Members of this family have been identified in plants, vertebrates, and invertebrates, and they share a conserved N-terminal transcription activation region and a conserved C-terminal DNA and phosphatidylinositol-phosphate binding region. The encoded protein binds to phosphoinositides in the plasma membrane via its C-terminal region and probably functions as a membrane-bound transcription regulator that translocates to the nucleus in response to phosphoinositide hydrolysis, for instance, induced by G-protein-coupled-receptor signaling. It plays an important role in neuronal development and function. Two transcript variants encoding distinct isoforms have been identified for this gene. [provided by RefSeq, May 2009]
