Thrombomodulin (THBD) (NM_000361) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Thrombomodulin (THBD) (NM 000361) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: Thrombomodulin

Synonyms: AHUS6; BDCA-3; BDCA3; CD141; THPH12; THRM; TM

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

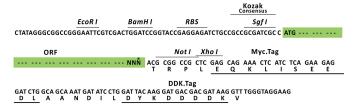

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC207598).

Sequence:

Restriction Sites: Sgfl-Notl

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_000361

ORF Size: 1725 bp

OTI Disclaimer:

Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at customercom or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>

OTI Annotation:

This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

Components:

Domains:

The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

- 1. Centrifuge at 5,000xg for 5min.
- 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
- 3. Close the tube and incubate for 10 minutes at room temperature.
- 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
- 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: <u>NM 000361.2</u>

 RefSeq Size:
 4048 bp

 RefSeq ORF:
 1728 bp

 Locus ID:
 7056

 UniProt ID:
 P07204

 Cytogenetics:
 20p11.21

Protein Families: Druggable Genome, Transmembrane
Protein Pathways: Complement and coagulation cascades

CLECT, EGF

MW: 60.4 kDa

Gene Summary: The protein encoded by this intronless gene is an endothelial-specific type I membrane

receptor that binds thrombin. This binding results in the activation of protein C, which degrades clotting factors Va and VIIIa and reduces the amount of thrombin generated. Mutations in this gene are a cause of thromboembolic disease, also known as inherited

thrombophilia. [provided by RefSeq, Jul 2008]
