## FYN (NM\_153048) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** FYN (NM\_153048) Human Tagged ORF Clone Lentiviral Particle

Symbol: FYN

**Synonyms:** p59-FYN; SLK; SYN

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

Tag: mGFP

**ACCN:** NM\_153048 **ORF Size:** 1446 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC207620).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 153048.1

 RefSeq Size:
 2959 bp

 RefSeq ORF:
 1449 bp

 Locus ID:
 2534

 UniProt ID:
 P06241

 Cytogenetics:
 6q21

**Domains:** pkinase, SH2, TyrKc, SH3, S\_TKc

**Protein Families:** Druggable Genome, Protein Kinase

## FYN (NM\_153048) Human Tagged ORF Clone Lentiviral Particle - RC207620L4V

**Protein Pathways:** Adherens junction, Axon guidance, Fc epsilon RI signaling pathway, Focal adhesion, Natural

killer cell mediated cytotoxicity, Pathogenic Escherichia coli infection, Prion diseases, T cell

receptor signaling pathway, Viral myocarditis

MW: 54.5 kDa

**Gene Summary:** This gene is a member of the protein-tyrosine kinase oncogene family. It encodes a

membrane-associated tyrosine kinase that has been implicated in the control of cell growth. The protein associates with the p85 subunit of phosphatidylinositol 3-kinase and interacts with the fyn-binding protein. Alternatively spliced transcript variants encoding distinct

isoforms exist. [provided by RefSeq, Jul 2008]
