

Product datasheet for RC207653L1

TLK1 (NM_012290) Human Tagged Lenti ORF Clone

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids							
Product Name:	TLK1 (NM_012290) Human Tagged Lenti ORF Clone							
Tag:	Myc-DDK							
Symbol:	TLK1							
Synonyms:	PKU-beta							
Mammalian Cell Selection:	None							
Vector:	pLenti-C-Myc-DDK (PS100064)							
E. coli Selection:	Chloramphenicol (34 ug/mL)							
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC207653).							
Restriction Sites:	Sgfl-RsrII							
Cloning Scheme:								
	Cloning sites used for ORF Shuttling: Sgf I ORF Rsr II GCG ATC GC C ATG // NNN AGC GGA CCG

* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM_012290 2298 bp

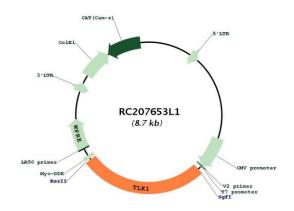

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

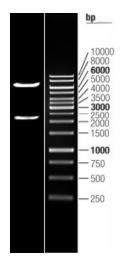

ORIGENE TLK1 (M	NM_012290) Human Tagged Lenti ORF Clone – RC207653L1
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	 Centrifuge at 5,000xg for 5min. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. Close the tube and incubate for 10 minutes at room temperature. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM 012290.3</u> , <u>NP 036422.3</u>
RefSeq Size:	5751 bp
RefSeq ORF:	2301 bp
Locus ID:	9874
UniProt ID:	<u>Q9UKI8</u>
Cytogenetics:	2q31.1
Domains:	pkinase, TyrKc, S_TKc
Protein Families:	Druggable Genome, Protein Kinase
MW:	86.7 kDa
Gene Summary:	The protein encoded by this gene is a serine/threonine kinase that may be involved in the regulation of chromatin assembly. The encoded protein is only active when it is phosphorylated, and this phosphorylation is cell cycle-dependent, with the maximal activity of this protein coming during S phase. The catalytic activity of this protein is diminished by DNA damage and by blockage of DNA replication. Three transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Nov 2011]
