CCR6 (NM 031409) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: CCR6 (NM_031409) Human Tagged ORF Clone Lentiviral Particle

Symbol: CCR6

Synonyms: BN-1; C-C CKR-6; CC-CKR-6; CCR-6; CD196; CKR-L3; CKRL3; CMKBR6; DCR2; DRY6; GPR29;

GPRCY4; STRL22

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

 Tag:
 Myc-DDK

 ACCN:
 NM_031409

ORF Size: 1122 bp

ORF Nucleotide

Sequence:

The ORF insert of this clone is exactly the same as(RC207722).

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: <u>NM 031409.2</u>

 RefSeq Size:
 3463 bp

 RefSeq ORF:
 1125 bp

 Locus ID:
 1235

 UniProt ID:
 P51684

 Cytogenetics:
 6q27

Domains: 7tm_1

CCR6 (NM_031409) Human Tagged ORF Clone Lentiviral Particle - RC207722L3V

Protein Families: Druggable Genome, GPCR, Transmembrane

Protein Pathways: Chemokine signaling pathway, Cytokine-cytokine receptor interaction

MW: 42.3 kDa

Gene Summary: This gene encodes a member of the beta chemokine receptor family, which is predicted to be

a seven transmembrane protein similar to G protein-coupled receptors. The gene is

preferentially expressed by immature dendritic cells and memory T cells. The ligand of this receptor is macrophage inflammatory protein 3 alpha (MIP-3 alpha). This receptor has been shown to be important for B-lineage maturation and antigen-driven B-cell differentiation, and it may regulate the migration and recruitment of dentritic and T cells during inflammatory and immunological responses. Alternatively spliced transcript variants that encode the same

protein have been described for this gene. [provided by RefSeq, Jul 2008]
