

Product datasheet for RC207789L4

PLA2G5 (NM_000929) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids Product Name: PLA2G5 (NM_000929) Human Tagged Lenti ORF Clone Tag: mGFP Symbol: PLA2G5 Synonyms: FRFB; GV-PLA2; hVPLA(2); PLA2-10 **Mammalian Cell** Puromycin Selection: Vector: pLenti-C-mGFP-P2A-Puro (PS100093) E. coli Selection: Chloramphenicol (34 ug/mL) The ORF insert of this clone is exactly the same as(RC207789). **ORF** Nucleotide Sequence: **Restriction Sites:** Sgfl-Mlul **Cloning Scheme:** Cloning sites used for ORF Shuttling:

	PLA2G5 (NM_000929) Human Tagged Lenti ORF Clone – RC207789L4
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Me	 2. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM 000929.2</u>
RefSeq Size:	1911 bp
RefSeq ORF:	417 bp
Locus ID:	5322
UniProt ID:	<u>P39877</u>
Cytogenetics:	1p36.13
Domains:	PA2c
Protein Families:	Druggable Genome, Secreted Protein
Protein Pathways	: alpha-Linolenic acid metabolism, Arachidonic acid metabolism, Ether lipid metabolism, Fc epsilon RI signaling pathway, Glycerophospholipid metabolism, GnRH signaling pathway, Linoleic acid metabolism, Long-term depression, MAPK signaling pathway, Metabolic pathways, Vascular smooth muscle contraction, VEGF signaling pathway
MW:	15.67 kDa

PLA2G5 (NM_000929) Human Tagged Lenti ORF Clone - RC207789L4

Gene Summary:This gene is a member of the secretory phospholipase A2 family. It is located in a tightly-
linked cluster of secretory phospholipase A2 genes on chromosome 1. The encoded enzyme
catalyzes the hydrolysis of membrane phospholipids to generate lysophospholipids and free
fatty acids including arachidonic acid. It preferentially hydrolyzes linoleoyl-containing
phosphatidylcholine substrates. Secretion of this enzyme is thought to induce inflammatory
responses in neighboring cells. Alternatively spliced transcript variants have been found, but
their full-length nature has not been determined. [provided by RefSeq, Jul 2008]
