Calpain 7 (CAPN7) (NM_014296) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Calpain 7 (CAPN7) (NM_014296) Human Tagged Lenti ORF Clone

Tag: Myc-DDK
Symbol: Calpain 7

Synonyms: CALPAIN7; PALBH

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of thi

Sequence:

The ORF insert of this clone is exactly the same as(RC208200).

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

st The last codon before the Stop codon of the ORF.

ACCN: NM_014296

ORF Size: 2439 bp

Calpain 7 (CAPN7) (NM_014296) Human Tagged Lenti ORF Clone - RC208200L3

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 014296.2</u>

 RefSeq Size:
 4385 bp

 RefSeq ORF:
 2442 bp

 Locus ID:
 23473

 UniProt ID:
 Q9Y6W3

Cytogenetics: 3p25.1

Domains: Calpain III, MIT

Protein Families: Druggable Genome, Protease

MW: 92.7 kDa

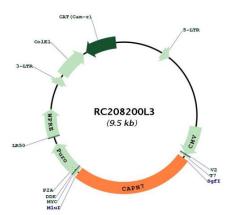

Gene Summary: Calpains are ubiquitous, well-conserved family of calcium-dependent, cysteine proteases. The

calpain proteins are heterodimers consisting of an invariant small subunit and variable large subunits. The large subunit possesses a cysteine protease domain, and both subunits possess calcium-binding domains. Calpains have been implicated in neurodegenerative processes, as their activation can be triggered by calcium influx and oxidative stress. The function of the protein encoded by this gene is not known. An orthologue has been found in mouse but it seems to diverge from other family members. The mouse orthologue is thought

to be calcium independent with protease activity. [provided by RefSeq, Jul 2008]
