DVL1 (NM_182779) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: DVL1 (NM_182779) Human Tagged ORF Clone Lentiviral Particle

Symbol: DVL1

Synonyms: dishevelled, dsh homolog 1 (Drosophila); dishevelled 1; dishevelled 1 (homologous to

Drosophila dsh); DVL; DVL, MGC54245; MGC54245; OTTHUMP0000003104

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

 Tag:
 Myc-DDK

 ACCN:
 NM_182779

 ORF Size:
 1332 bp

ORF Nucleotide

Sequence:

The ORF insert of this clone is exactly the same as(RC208406).

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: <u>NM 182779.2</u>, <u>NP 877580.1</u>

RefSeq Size: 2266 bp
RefSeq ORF: 1334 bp
Locus ID: 1855
Cytogenetics: 1p36.33

Protein Families: Druggable Genome, ES Cell Differentiation/IPS

Protein Pathways: Basal cell carcinoma, Colorectal cancer, Melanogenesis, Notch signaling pathway, Pathways in

cancer, Wnt signaling pathway

MW: 47.7 kDa

Gene Summary: DVL1, the human homolog of the Drosophila dishevelled gene (dsh) encodes a cytoplasmic

phosphoprotein that regulates cell proliferation, acting as a transducer molecule for developmental processes, including segmentation and neuroblast specification. DVL1 is a candidate gene for neuroblastomatous transformation. The Schwartz-Jampel syndrome and Charcot-Marie-Tooth disease type 2A have been mapped to the same region as DVL1. The phenotypes of these diseases may be consistent with defects which might be expected from aberrant expression of a DVL gene during development. [provided by RefSeq, Jul 2008]
