

### Product datasheet for RC208530L4

# PARG (NM\_003631) Human Tagged Lenti ORF Clone

#### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** PARG (NM\_003631) Human Tagged Lenti ORF Clone

Tag: mGFP
Symbol: PARG
Synonyms: PARG99

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC208530).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF

ACCN: NM\_003631

ORF Size: 2928 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

#### PARG (NM\_003631) Human Tagged Lenti ORF Clone - RC208530L4

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

Q86W56

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 003631.2</u>

RefSeq Size:4276 bpRefSeq ORF:2931 bp

Locus ID: 8505

**UniProt ID:** 

Cytogenetics: 10q11.23

Domains: PARG

**MW:** 111.1 kDa

**Gene Summary:** Poly(ADP-ribose) glycohydrolase (PARG) is the major enzyme responsible for the catabolism

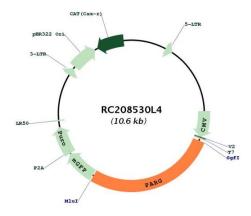

of poly(ADP-ribose), a reversible covalent-modifier of chromosomal proteins. The protein is found in many tissues and may be subject to proteolysis generating smaller, active products.

Several transcript variants encoding different isoforms have been found for this gene.

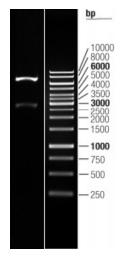

[provided by RefSeq, Jan 2015]
