## 14-3-3 theta (YWHAQ) (NM 006826) Human Tagged ORF Clone Lentiviral Particle

#### **Product data:**

**Product Type:** Lentiviral Particles

**Product Name:** 14-3-3 theta (YWHAQ) (NM\_006826) Human Tagged ORF Clone Lentiviral Particle

Symbol: 14-3-3 theta

**Synonyms:** 1C5; 14-3-3; HS1

Mammalian Cell

Selection:

None

**Vector:** pLenti-C-mGFP (PS100071)

Tag: mGFP

**ACCN:** NM\_006826

ORF Size: 735 bp

**ORF Nucleotide** 

TI ODE

Sequence:
OTI Disclaimer:

The ORF insert of this clone is exactly the same as(RC208646).

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 006826.2

 RefSeq Size:
 2272 bp

 RefSeq ORF:
 738 bp

 Locus ID:
 10971

 UniProt ID:
 P27348

 Cytogenetics:
 2p25.1

**Domains:** 14-3-3

**Protein Families:** Druggable Genome

### 14-3-3 theta (YWHAQ) (NM\_006826) Human Tagged ORF Clone Lentiviral Particle - RC208646L2V

**Protein Pathways:** Cell cycle, Neurotrophin signaling pathway, Oocyte meiosis, Pathogenic Escherichia coli

infection

**MW:** 27.8 kDa

**Gene Summary:** This gene product belongs to the 14-3-3 family of proteins which mediate signal transduction

by binding to phosphoserine-containing proteins. This highly conserved protein family is found in both plants and mammals, and this protein is 99% identical to the mouse and rat orthologs. This gene is upregulated in patients with amyotrophic lateral sclerosis. It contains in its 5' UTR a 6 bp tandem repeat sequence which is polymorphic, however, there is no correlation between the repeat number and the disease. [provided by RefSeq, Jul 2008]
