## CTNNA2 (NM 004389) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** CTNNA2 (NM 004389) Human Tagged ORF Clone Lentiviral Particle

Symbol:

CAP-R; CAPR; CDCBM9; CT114; CTNR Synonyms:

**Mammalian Cell** 

Selection:

Puromycin

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK NM 004389 ACCN:

**ORF Size:** 2715 bp

**ORF Nucleotide** 

OTI Disclaimer:

Sequence:

The ORF insert of this clone is exactly the same as(RC208731).

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 004389.2

RefSeq Size: 4005 bp RefSeq ORF: 2718 bp Locus ID: 1496 P26232 **UniProt ID:** Cytogenetics: 2p12

**Domains:** Vinculin

**Protein Families:** Druggable Genome

## CTNNA2 (NM\_004389) Human Tagged ORF Clone Lentiviral Particle - RC208731L3V

**Protein Pathways:** Adherens junction, Arrhythmogenic right ventricular cardiomyopathy (ARVC), Endometrial

cancer, Leukocyte transendothelial migration, Pathways in cancer, Tight junction

MW: 100.4 kDa

**Gene Summary:** May function as a linker between cadherin adhesion receptors and the cytoskeleton to

regulate cell-cell adhesion and differentiation in the nervous system (By similarity). Required for proper regulation of cortical neuronal migration and neurite growth (PubMed:30013181).

It acts as negative regulator of Arp2/3 complex activity and Arp2/3-mediated actin

polymerization (PubMed:30013181). It thereby suppresses excessive actin branching which would impair neurite growth and stability (PubMed:30013181). Regulates morphological plasticity of synapses and cerebellar and hippocampal lamination during development. Functions in the control of startle modulation (By similarity).[UniProtKB/Swiss-Prot Function]
