Product datasheet for RC208772L1V

FRG1 (NM_004477) Human Tagged ORF Clone Lentiviral Particle

Product data:

| Product Type: | Lentiviral Particles |
|------------------------------|---|
| Product Name: | FRG1 (NM_004477) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | FRG1 |
| Synonyms: | FRG1A; FSG1 |
| Mammalian Cell Selection: | None |
| Vector: | pLenti-C-Myc-DDK (PS100064) |
| Tag: | Myc-DDK |
| ACCN: | NM_004477 |
| ORF Size: | 774 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC208772). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | <u>NM 004477.2</u> |
| RefSeq Size: | 1053 bp |
| RefSeq ORF: | 777 bp |
| Locus ID: | 2483 |
| UniProt ID: | <u>Q14331</u> |
| Cytogenetics: | 4q35.2 |
| MW: | 29.2 kDa |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary: This gene maps to a location 100 kb centromeric of the repeat units on chromosome 4q35 which are deleted in facioscapulohumeral muscular dystrophy (FSHD). It is evolutionarily conserved and has related sequences on multiple human chromosomes but DNA sequence analysis did not reveal any homology to known genes. In vivo studies demonstrate the encoded protein is localized to the nucleolus. [provided by RefSeq, Jul 2008]
