	Vitamin D Binding protein (GC) (NM_000583) Human Tagged ORF Clone Lentiviral Particle – RC208864L1V
MW:	52.9 kDa
Gene Summary:	The protein encoded by this gene belongs to the albumin gene family. It is a multifunctional protein found in plasma, ascitic fluid, cerebrospinal fluid and on the surface of many cell types. It binds to vitamin D and its plasma metabolites and transports them to target tissues. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.[provided by RefSeq, Feb 2011]
