Product datasheet for RC209127L3

FOXL2 (NM_023067) Human Tagged ORF Clone

Product data:

Product Type: Expression Plasmids
Product Name: FOXL2 (NM_023067) Human Tagged ORF Clone
Tag: Myc-DDK
Symbol: FOXL2
Synonyms: BPES; BPES1; PFRK; PINTO; POF3
Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)
E. coli Selection: Chloramphenicol (34 ug/mL)
Cell Selection: Puromycin
ORF Nucleotide Sequence: The ORF insert of this clone is exactly the same as (RC209127).
Restriction Sites: SgfI-RsrII
Cloning Scheme:

ACCN: NM_023067
ORF Size: 1128 bp
OTI Disclaimer: Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at custsupport@origene.com or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

RefSeq: NM_023067.2, NP_075555.1
RefSeq Size: 2744 bp
RefSeq ORF: 1131 bp
Locus ID: 668
Cytogenetics: 3q22.3
Protein Families: Druggable Genome, Transcription Factors
MW: 38.6 kDa
Gene Summary: This gene encodes a forkhead transcription factor. The protein contains a fork-head DNA-binding domain and may play a role in ovarian development and function. Expansion of a polyalanine repeat region and other mutations in this gene are a cause of blepharophimosis syndrome and premature ovarian failure 3. [provided by RefSeq, Jul 2016]
