

# Product datasheet for RC209139L1

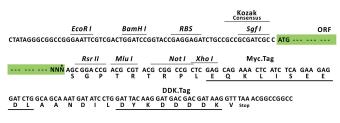

# SOX4 (NM\_003107) Human Tagged Lenti ORF Clone

## **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids
Product Name:	SOX4 (NM_003107) Human Tagged Lenti ORF Clone
Tag:	Myc-DDK
Symbol:	SOX4
Synonyms:	CSS10; EVI16
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC209139).
<b>Restriction Sites:</b>	Sgfl-Rsrll
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I         ORF         Rsr II            GCG ATC GC         ATG // NNN         AG         C GGA CCG

\* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM\_003107 1422 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

# SOX4 (NM\_003107) Human Tagged Lenti ORF Clone – RC209139L1

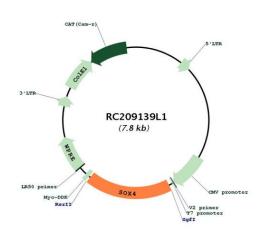

OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 003107.2</u>
RefSeq Size:	4912 bp
RefSeq ORF:	1425 bp
Locus ID:	6659
UniProt ID:	<u>Q06945</u>
Cytogenetics:	6p22.3
Domains:	HMG
Protein Families:	Druggable Genome, ES Cell Differentiation/IPS, Induced pluripotent stem cells, Stem cell relevant signaling - TGFb/BMP signaling pathway, Transcription Factors
MW:	47.3 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### SOX4 (NM\_003107) Human Tagged Lenti ORF Clone – RC209139L1

# Gene Summary:This intronless gene encodes a member of the SOX (SRY-related HMG-box) family of<br/>transcription factors involved in the regulation of embryonic development and in the<br/>determination of the cell fate. The encoded protein may act as a transcriptional regulator<br/>after forming a protein complex with other proteins, such as syndecan binding protein<br/>(syntenin). The protein may function in the apoptosis pathway leading to cell death as well as<br/>to tumorigenesis and may mediate downstream effects of parathyroid hormone (PTH) and<br/>PTH-related protein (PTHrP) in bone development. The solution structure has been resolved<br/>for the HMG-box of a similar mouse protein. [provided by RefSeq, Jul 2008]
