	Munc 13 4 (UNC13D) (NM_199242) Human Tagged ORF Clone Lentiviral Particle – RC209141L1V
Gene Summary:	This gene encodes a protein that is a member of the UNC13 family, containing similar
	domain structure as other family members but lacking an N-terminal phorbol ester-binding
	C1 domain present in other Munc13 proteins. The protein appears to play a role in vesicle
	maturation during exocytosis and is involved in regulation of cytolytic granules secretion.
	Mutations in this gene are associated with familial hemophagocytic lymphohistiocytosis type
