ALPK1 (NM_025144) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: ALPK1 (NM 025144) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: ALPK1

Synonyms: 8430410J10Rik; LAK

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC209189).

Sgfl-Mlul

Sequence:

Restriction Sites: Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_025144

ORF Size: 3732 bp

OTI Disclaimer:

Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at custsupport@origene.com or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>

OTI Annotation:

This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

Components:

Cytogenetics:

The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

- 1. Centrifuge at 5,000xg for 5min.
- 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
- 3. Close the tube and incubate for 10 minutes at room temperature.
- 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
- 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: <u>NM 025144.4</u>

 RefSeq Size:
 5399 bp

 RefSeq ORF:
 3735 bp

 Locus ID:
 80216

 UniProt ID:
 Q96QP1

Domains: MHCK_EF2_kinase

Protein Families: Druggable Genome, Protein Kinase

4q25

MW: 138.9 kDa

Gene Summary: This gene encodes an alpha kinase. Mice which were homozygous for disrupted copies of this

gene exhibited coordination defects (PMID: 21208416). Multiple transcript variants encoding

different isoforms have been found for this gene. [provided by RefSeq, Dec 2011]
