OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq Size: 2409 bp
RefSeq ORF: 2205 bp
Locus ID: 56265
UniProt ID: Q96SM3

Gene Summary: This gene likely encodes a member of the carboxypeptidase family of proteins. Cloning of a

comparable locus in mouse indicates that the encoded protein contains a discoidin domain and a carboxypeptidase domain, but the protein appears to lack residues necessary for

carboxypeptidase activity.[provided by RefSeq, May 2010]
