ORIGENE MCCC2 (NM_022132) Human Tagged ORF Clone Lentiviral Particle – RC209488L2V	
Protein Pathways	Metabolic pathways, Valine, leucine and isoleucine degradation
MW:	61.3 kDa
Gene Summary:	This gene encodes the small subunit of 3-methylcrotonyl-CoA carboxylase. This enzyme functions as a heterodimer and catalyzes the carboxylation of 3-methylcrotonyl-CoA to form 3-methylglutaconyl-CoA. Mutations in this gene are associated with 3- Methylcrotonylglycinuria, an autosomal recessive disorder of leucine catabolism. Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided by RefSeq, May 2018]
