

Product datasheet for RC209568L1

CD73 (NT5E) (NM_002526) Human Tagged Lenti ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	CD73 (NT5E) (NM_002526) Human Tagged Lenti ORF Clone
Tag:	Myc-DDK
Symbol:	CD73
Synonyms:	CALJA; CD73; E5NT; eN; eNT; NT; NT5; NTE
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC209568).
Restriction Sites:	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I ORF Mlu I GCG ATC GC C <mark>ATG // NNŇ</mark> ACG CGT

ACCN: ORF Size: NM_002526 1722 bp

ORIGENE CD73 (NT5E) (NM_002526) Human Tagged Lenti ORF Clone – RC209568L1
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	 Centrifuge at 5,000xg for 5min. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. Close the tube and incubate for 10 minutes at room temperature. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM 002526.1</u>
RefSeq Size:	4086 bp
RefSeq ORF:	1725 bp
Locus ID:	4907
UniProt ID:	<u>P21589</u>
Cytogenetics:	6q14.3
Domains:	Metallophos, 5_nucleotidaseC
Protein Families:	ES Cell Differentiation/IPS, Transmembrane
Protein Pathways:	Metabolic pathways, Nicotinate and nicotinamide metabolism, Purine metabolism, Pyrimidine metabolism
MW:	63.3 kDa

Gene Summary:The protein encoded by this gene is a plasma membrane protein that catalyzes the
conversion of extracellular nucleotides to membrane-permeable nucleosides. The encoded
protein is used as a determinant of lymphocyte differentiation. Defects in this gene can lead
to the calcification of joints and arteries. Two transcript variants encoding different isoforms
have been found for this gene.[provided by RefSeq, Mar 2011]
