Product datasheet for RC209605L3V

LACTB (NM_032857) Human Tagged ORF Clone Lentiviral Particle

Product data:

| Product Type: | Lentiviral Particles |
|------------------------------|---|
| Product Name: | LACTB (NM_032857) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | LACTB |
| Synonyms: | G24; MRPL56 |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-Myc-DDK-P2A-Puro (PS100092) |
| Tag: | Myc-DDK |
| ACCN: | NM_032857 |
| ORF Size: | 1641 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC209605). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | <u>NM 032857.2</u> |
| RefSeq Size: | 1976 bp |
| RefSeq ORF: | 1644 bp |
| Locus ID: | 114294 |
| UniProt ID: | <u>P83111</u> |
| Cytogenetics: | 15q22.2 |
| Domains: | beta-lactamase |
| Protein Families: | Protease |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| | LACTB (NM_032857) Human Tagged ORF Clone Lentiviral Particle – RC209605L3V |
|---------------|---|
| MW: | 60.7 kDa |
| Gene Summary: | This gene encodes a mitochondrially-localized protein that has sequence similarity to prokaryotic beta-lactamases. Many of the residues responsible for beta-lactamase activity are not conserved in this protein, suggesting it may have a different enzymatic function. Increased expression of the related mouse gene was found to be associated with obesity. Alternative splicing results in multiple transcript variants encoding different protein isoforms. [provided by RefSeq, Dec 2013] |
