# Product datasheet for RC209717L1

### Frizzled 10 (FZD10) (NM\_007197) Human Tagged Lenti ORF Clone

# **Product data:**

| Product Type:                | Expression Plasmids   |
|------------------------------|---|
| Product Name:                | Frizzled 10 (FZD10) (NM_007197) Human Tagged Lenti ORF Clone                                  |
| Tag:                         | Myc-DDK   |
| Symbol:                      | Frizzled 10   |
| Synonyms:                    | CD350; FZ-10; Fz10; FzE7; hFz10   |
| Mammalian Cell<br>Selection: | None  |
| Vector:                      | pLenti-C-Myc-DDK (PS100064)   |
| E. coli Selection:           | Chloramphenicol (34 ug/mL)  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC209717).                                |
| <b>Restriction Sites:</b>    | Sgfl-Mlul   |
| Cloning Scheme:              |   |
|                              | Cloning sites used for ORF Shuttling:   |
|                              | Sgf1         ORF         Mlu I            GCG ATC GCC         ATG          NN         ACG CGT |

\* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM\_007197 1743 bp

|                   | rizzled 10 (FZD10) (NM_007197) Human Tagged Lenti ORF Clone – RC209717L1   |
|-------------------|--|
| OTI Disclaimer:   | Due to the inherent nature of this plasmid, standard methods to replicate additional amounts<br>of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore,<br>OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts<br>of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a<br>reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by<br>calling 301.340.3188 option 3 for pricing and delivery. |
|                   | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>  |
| OTI Annotation:   | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:       | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Me | <ul> <li>thod: 1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>  |
| RefSeq:           | <u>NM 007197.2</u>   |
| RefSeq Size:      | 3260 bp  |
| RefSeq ORF:       | 1746 bp  |
| Locus ID:         | 11211  |
| UniProt ID:       | Q9ULW2   |
| Cytogenetics:     | 12q24.33   |
| Domains:          | FRI, Frizzled  |
| Protein Families: | Druggable Genome, GPCR, Transmembrane  |
| Protein Pathways: | Basal cell carcinoma, Colorectal cancer, Melanogenesis, Pathways in cancer, Wnt signaling<br>pathway   |
| MW:               | 65.2 kDa   |
|                   |  |

Gene Summary:This gene is a member of the frizzled gene family. Members of this family encode 7-<br/>transmembrane domain proteins that are receptors for the Wingless type MMTV integration<br/>site family of signaling proteins. Most frizzled receptors are coupled to the beta-catenin<br/>canonical signaling pathway. Using array analysis, expression of this intronless gene is<br/>significantly up-regulated in two cases of primary colon cancer. [provided by RefSeq, Jul 2008]
