Hormone sensitive lipase (LIPE) (NM 005357) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Hormone sensitive lipase (LIPE) (NM_005357) Human Tagged ORF Clone Lentiviral Particle

Symbol: Hormone sensitive lipase

Synonyms: AOMS4; FPLD6; HSL; LHS; REH

Mammalian Cell

Selection:

None

Vector: pLenti-C-mGFP (PS100071)

Tag: mGFP

ACCN: NM_005357 **ORF Size:** 3228 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC209729).

Sequence:

OTI Disclaimer:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 005357.2

 RefSeq Size:
 3829 bp

 RefSeq ORF:
 3231 bp

 Locus ID:
 3991

 UniProt ID:
 Q05469

 Cytogenetics:
 19q13.2

Protein Pathways: Insulin signaling pathway

MW: 116.6 kDa

Hormone sensitive lipase (LIPE) (NM_005357) Human Tagged ORF Clone Lentiviral Particle – RC209729L2V

Gene Summary:

The protein encoded by this gene has a long and a short form, generated by use of alternative translational start codons. The long form is expressed in steroidogenic tissues such as testis, where it converts cholesteryl esters to free cholesterol for steroid hormone production. The short form is expressed in adipose tissue, among others, where it hydrolyzes stored triglycerides to free fatty acids. [provided by RefSeq, Jul 2008]
