ATP6V0A2 (NM_012463) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: ATP6V0A2 (NM_012463) Human Tagged Lenti ORF Clone

Tag: mGFP

Symbol: ATP6V0A2

Synonyms: A2; a2V; ARCL; ARCL2A; ATP6A2; ATP6N1D; J6B7; RTF; STV1; TJ6; TJ6M; TJ6S; VPH1; WSS

Mammalian Cell Pur

Selection:

Puromycin

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

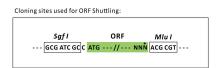

ORF Nucleotide

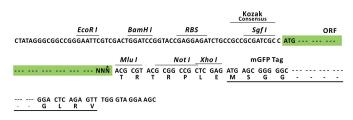

The ORF insert of this clone is exactly the same as(RC209819).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

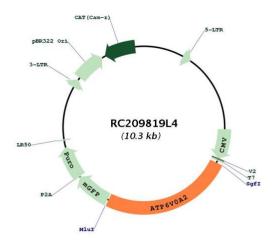

^{*} The last codon before the Stop codon of the ORF.

Plasmid Map:

ACCN: NM_012463 **ORF Size:** 2568 bp

OTI Disclaimer: Due to the inherent nature of this plasmid, standard methods to replicate additional amounts

of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at customer.com or by

calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

ATP6V0A2 (NM_012463) Human Tagged Lenti ORF Clone - RC209819L4

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 012463.2</u>

 RefSeq Size:
 4681 bp

 RefSeq ORF:
 2571 bp

 Locus ID:
 23545

 UniProt ID:
 Q9Y487

Cytogenetics: 12q24.31

Domains:V_ATPase_sub_aProtein Families:Transmembrane

Protein Pathways: Epithelial cell signaling in Helicobacter pylori infection, Lysosome, Metabolic pathways,

Oxidative phosphorylation, Vibrio cholerae infection

MW: 97.9 kDa

Gene Summary: The protein encoded by this gene is a subunit of the vacuolar ATPase (v-ATPase), an

heteromultimeric enzyme that is present in intracellular vesicles and in the plasma

membrane of specialized cells, and which is essential for the acidification of diverse cellular

components. V-ATPase is comprised of a membrane peripheral V(1) domain for ATP hydrolysis, and an integral membrane V(0) domain for proton translocation. The subunit encoded by this gene is a component of the V(0) domain. Mutations in this gene are a cause

of both cutis laxa type II and wrinkly skin syndrome. [provided by RefSeq, Jul 2009]
