

Product datasheet for RC209965

KCNH5 (NM_139318) Human Tagged ORF Clone

Product data:

Product Type: **Expression Plasmids Product Name:** KCNH5 (NM_139318) Human Tagged ORF Clone Tag: Myc-DDK Symbol: KCNH5 EAG2; H-EAG2; hEAG2; Kv10.2 Synonyms: Mammalian Cell Neomycin Selection: Vector: pCMV6-Entry (PS100001) E. coli Selection: Kanamycin (25 ug/mL) **Restriction Sites:** Sgfl-Mlul Cloning sites used for ORF Shuttling: **Cloning Scheme:** ORF Sgfl Mlu I ACG CGT GCGATCGC

* The last codon before the Stop codon of the ORF

NM_139318

2964 bp

ACCN: ORF Size:

	NH5 (NM_139318) Human Tagged ORF Clone – RC209965
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Meth	 1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM 139318.1</u>
RefSeq Size:	3308 bp
RefSeq ORF:	2967 bp
Locus ID:	27133
UniProt ID:	<u>Q8NCM2</u>
Cytogenetics:	14q23.2
Protein Families:	Druggable Genome, Ion Channels: Potassium, Transmembrane
MW:	111.7 kDa
Gene Summary:	This gene encodes a member of voltage-gated potassium channels. Members of this family have diverse functions, including regulating neurotransmitter and hormone release, cardiac function, and cell volume. This protein is an outward-rectifying, noninactivating channel. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jul 2013]
