

Product datasheet for RC210121L4

PAEP (NM_002571) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: PAEP (NM_002571) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: PAEP

Synonyms: GD; GdA; GdF; GdS; PAEG; PEP; PP14; ZIF-1

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC210121).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_002571

ORF Size: 540 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

PAEP (NM_002571) Human Tagged Lenti ORF Clone - RC210121L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: NM 002571.2

 RefSeq Size:
 828 bp

 RefSeq ORF:
 543 bp

 Locus ID:
 5047

 UniProt ID:
 P09466

Protein Families: Druggable Genome

9q34.3

MW: 20.6 kDa

Cytogenetics:

Gene Summary: This gene is a member of the kernel lipocalin superfamily whose members share relatively

low sequence similarity but have highly conserved exon/intron structure and three-

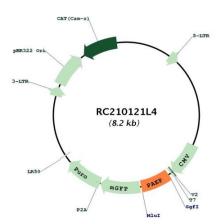

dimensional protein folding. Most lipocalins are clustered on the long arm of chromosome 9.

The encoded glycoprotein has been previously referred to as pregnancy-associated endometrial alpha-2-globulin, placental protein 14, and glycodelin, but has been officially named progestagen-associated endometrial protein. Three distinct forms, with identical protein backbones but different glycosylation profiles, are found in amniotic fluid, follicular fluid and seminal plasma of the reproductive system. These glycoproteins have distinct and essential roles in regulating a uterine environment suitable for pregnancy and in the timing and occurrence of the appropriate sequence of events in the fertilization process. Alternative

splicing results in multiple transcript variants. [provided by RefSeq, Oct 2015]
