

## Product datasheet for **RC210143A1V**

### Human Mannan Binding Lectin (MBL2) (NM\_000242) AAV Particle

#### Product data:

|                           |                                                                   |
|---------------------------|-------------------------------------------------------------------|
| Product Type:             | AAV Particles                                                     |
| Product Name:             | Human Mannan Binding Lectin (MBL2) (NM_000242) AAV Particle       |
| Tag:                      | Myc-DDK                                                           |
| Symbol:                   | Mannan Binding Lectin                                             |
| Synonyms:                 | COLEC1; HSMBPC; MBL; MBL2D; MBP; MBP-C; MBP1; MBPD                |
| Mammalian Cell Selection: | None                                                              |
| Vector:                   | pAAV-AC-Myc-DDK (PS100089)                                        |

| ORF Size:         | 744 bp                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Buffer:           | PBS with 0.001% Pluronic F68                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Stability:        | AAV is stable for 1 year when stored at -80°C (long-term storage) or 2-3 weeks when stored at -20°C (short-term storage). Thaw the vial of AAV on ice prior to use and keep it on ice during the experiment. Thawed AAV can be stored at 4°C for 1-2 weeks. Whenever possible, particles should be aliquoted into single use portions to avoid repeated freeze/thaw cycles. Please aliquot at least 10ul per tube and use low protein binding tubes to avoid loss of virus. |
