Product datasheet for RC210205L3V

Carboxylesterase 7 (CES5A) (NM_145024) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type:	Lentiviral Particles
Product Name:	Carboxylesterase 7 (CES5A) (NM_145024) Human Tagged ORF Clone Lentiviral Particle
Symbol:	Carboxylesterase 7
Synonyms:	CAUXIN; CES4C1; CES5; CES7; HEL126
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-Myc-DDK-P2A-Puro (PS100092)
Tag:	Myc-DDK
ACCN:	NM_145024
ORF Size:	1575 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC210205).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 145024.1</u>
RefSeq Size:	1962 bp
RefSeq ORF:	1578 bp
Locus ID:	221223
UniProt ID:	<u>Q6NT32</u>
Cytogenetics:	16q12.2
Domains:	COesterase
Protein Families:	Druggable Genome

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	arboxylesterase 7 (CES5A) (NM_145024) Human Tagged ORF Clone Lentiviral Particle – C210205L3V	
Protein Pathwa	Drug metabolism - other enzymes	
MW:	58 kDa	
Gene Summary	This gene encodes a member of the carboxylesterase large family. The family memb responsible for the hydrolysis or transesterification of various xenobiotics, such as co and heroin, and endogenous substrates with ester, thioester, or amide bonds. They a participate in fatty acyl and cholesterol ester metabolism, and may play a role in the brain barrier system. This gene, also called CES5, is predominantly expressed in perip tissues, including brain, kidney, lung and testis. It encodes a secreted enzyme. Becau high levels in the urine of male domestic cats, this enzyme is also called cauxin (carboxylesterase-like urinary excreted protein). The enzyme functions in regulating to production of a pheromone precursor and may contribute to lipid and cholesterol tra- processes within male reproductive fluids. Multiple transcript variants encoding differ isoforms have been found for this gene. [provided by RefSeq, Jun 2010]	ocaine also blood- pheral ise of the ansfer
