

Product datasheet for RC210401L1

COLQ (NM_005677) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: COLQ (NM_005677) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: COLQ

Synonyms: CMS5; EAD

Mammalian Cell None

Selection:

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC210401).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_005677

ORF Size: 1365 bp

COLQ (NM_005677) Human Tagged Lenti ORF Clone - RC210401L1

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 005677.3</u>

 RefSeq Size:
 3007 bp

 RefSeq ORF:
 1368 bp

 Locus ID:
 8292

 UniProt ID:
 Q9Y215

Cytogenetics: 3p25.1

Protein Families: Druggable Genome, Transmembrane

MW: 47.8 kDa

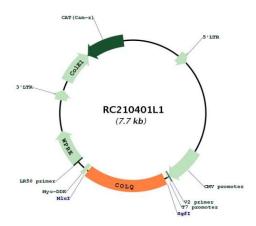

Gene Summary: This gene encodes the subunit of a collagen-like molecule associated with

acetylcholinesterase in skeletal muscle. Each molecule is composed of three identical subunits. Each subunit contains a proline-rich attachment domain (PRAD) that binds an acetylcholinesterase tetramer to anchor the catalytic subunit of the enzyme to the basal lamina. Mutations in this gene are associated with endplate acetylcholinesterase deficiency. Multiple transcript variants encoding different isoforms have been found for this gene.
