Alkaline Phosphatase (ALPP) (NM 001632) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Alkaline Phosphatase (ALPP) (NM_001632) Human Tagged ORF Clone Lentiviral Particle

Symbol: Alkaline Phosphatase

Synonyms: ALP; ALPI; IAP; PALP; PLAP-1

Mammalian Cell

Selection:

None

Vector: pLenti-C-Myc-DDK (PS100064)

Tag: Myc-DDK
ACCN: NM 001632

ORF Size: 1605 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC210504).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 001632.3

RefSeq Size: 2883 bp
RefSeq ORF: 1608 bp
Locus ID: 250

 UniProt ID:
 P05187

 Cytogenetics:
 2q37.1

zytogenetics. 2437.1

Domains: alk_phosphatase

Protein Pathways: Folate biosynthesis, Metabolic pathways

Alkaline Phosphatase (ALPP) (NM_001632) Human Tagged ORF Clone Lentiviral Particle – RC210504L1V

MW:

58 kDa

Gene Summary:

The protein encoded by this gene is an alkaline phosphatase, a metalloenzyme that catalyzes the hydrolysis of phosphoric acid monoesters. It belongs to a multigene family composed of four alkaline phosphatase isoenzymes. The enzyme functions as a homodimer and has a catalytic site containing one magnesium and two zinc ions, which are required for its enzymatic function. One of the main sources of this enzyme is the liver, and thus, it's one of several indicators of liver injury in different clinical conditions. In pregnant women, this protein is primarily expressed in placental and endometrial tissue, however, strong ectopic expression has been detected in ovarian adenocarcinoma, serous cystadenocarcinoma, and other ovarian cancer cells. [provided by RefSeq, Aug 2020]
