Gene Summary:The protein encoded by this gene is a member of the SEC23 subfamily of the SEC23/SEC24
family, which is involved in vesicle trafficking. The encoded protein has similarity to yeast
Sec23p component of COPII. COPII is the coat protein complex responsible for vesicle
budding from the ER. The function of this gene product has been implicated in cargo
selection and concentration. Multiple alternatively spliced transcript variants have been
identified in this gene. [provided by RefSeq, Feb 2010]
