

## Product datasheet for **RC210647A1V**

### Human TRAPPC2L (NM\_016209) AAV Particle

#### Product data:

**Product Type:** AAV Particles  
**Product Name:** Human TRAPPC2L (NM\_016209) AAV Particle  
**Tag:** Myc-DDK  
**Symbol:** TRAPPC2L  
**Synonyms:** HSPC176; PERRB  
**Mammalian Cell Selection:** None  
**Vector:** pAAV-AC-Myc-DDK (PS100089)  
**ORF Nucleotide Sequence:** >RC210647 ORF sequence  
 Red=Cloning site Blue=ORF Green=Tags(s)

|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>ORF Size:</b>     | 420 bp                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Buffer:</b>       | PBS with 0.001% Pluronic F68                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Stability:</b>    | AAV is stable for 1 year when stored at -80°C (long-term storage) or 2-3 weeks when stored at -20°C (short-term storage). Thaw the vial of AAV on ice prior to use and keep it on ice during the experiment. Thawed AAV can be stored at 4°C for 1-2 weeks. Whenever possible, particles should be aliquoted into single use portions to avoid repeated freeze/thaw cycles. Please aliquot at least 10ul per tube and use low protein binding tubes to avoid loss of virus. |
| <b>RefSeq:</b>       | <u><a href="#">NM_016209.1</a></u>                                                                                                                                                                                                                                                                                                                                                                                                                                          |
