Cholecystokinin (CCK) (NM_000729) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Cholecystokinin (CCK) (NM_000729) Human Tagged Lenti ORF Clone

Tag: mGFF

Symbol: Cholecystokinin

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide

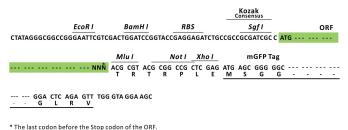

The ORF insert of this clone is exactly the same as(RC210694).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

ACCN: NM_000729

ORF Size: 345 bp

Cholecystokinin (CCK) (NM_000729) Human Tagged Lenti ORF Clone - RC210694L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 000729.3</u>

RefSeq Size: 1511 bp
RefSeq ORF: 348 bp
Locus ID: 885

UniProt ID: P06307

Cytogenetics: 3p22.1

Domains: Gastrin

Protein Families: Druggable Genome, Secreted Protein

MW: 12.7 kDa

Gene Summary: This gene encodes a member of the gastrin/cholecystokinin family of proteins. The encoded

preproprotein is proteolytically processed to generate multiple protein products, including the peptide hormones cholecystokinin-8, -12, -33, and others. The encoded peptides have

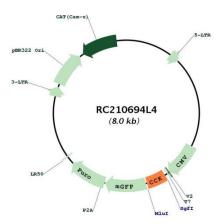

been shown to regulate gastric acid secretion and food intake. A sulfated form of

cholecystokinin-8 may modulate neuronal activity in the brain. Alternative splicing results in

multiple transcript variants. [provided by RefSeq, Nov 2015]
