Visfatin (NAMPT) (NM_005746) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Visfatin (NAMPT) (NM 005746) Human Tagged ORF Clone Lentiviral Particle

Symbol: NAMPT

Synonyms: 1110035O14Rik; PBEF; PBEF1; VF; VISFATIN

Mammalian Cell

Selection:

None

Vector: pLenti-C-mGFP (PS100071)

Tag: mGFP

ACCN: NM_005746 **ORF Size:** 1473 bp

ORF Nucleotide

OTI Disclaimer:

Sequence:

The ORF insert of this clone is exactly the same as(RC210707).

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 005746.2

 RefSeq Size:
 4593 bp

 RefSeq ORF:
 1476 bp

 Locus ID:
 10135

 UniProt ID:
 P43490

 Cytogenetics:
 7q22.3

Domains: NAPRTase

Protein Families: Druggable Genome

Visfatin (NAMPT) (NM_005746) Human Tagged ORF Clone Lentiviral Particle - RC210707L2V

Protein Pathways: Nicotinate and nicotinamide metabolism

MW: 55.52 kDa

Gene Summary: This gene encodes a protein that catalyzes the condensation of nicotinamide with 5-

phosphoribosyl-1-pyrophosphate to yield nicotinamide mononucleotide, one step in the biosynthesis of nicotinamide adenine dinucleotide. The protein belongs to the nicotinic acid phosphoribosyltransferase (NAPRTase) family and is thought to be involved in many

important biological processes, including metabolism, stress response and aging. This gene

has a pseudogene on chromosome 10. [provided by RefSeq, Feb 2011]
