

Product datasheet for **RC210851L1V**

PACAP (ADCYAP1) (NM_001117) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | PACAP (ADCYAP1) (NM_001117) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | PACAP |
| Synonyms: | PACAP |
| Mammalian Cell Selection: | None |
| Vector: | pLenti-C-Myc-DDK (PS100064) |
| Tag: | Myc-DDK |
| ACCN: | NM_001117 |
| ORF Size: | 528 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC210851). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_001117.2 |
| RefSeq Size: | 3259 bp |
| RefSeq ORF: | 531 bp |
| Locus ID: | 116 |
| UniProt ID: | P18509 |
| Cytogenetics: | 18p11.32 |
| Domains: | GLUCA |
| Protein Families: | Secreted Protein |

MW: 18.8 kDa

Gene Summary: This gene encodes a secreted proprotein that is further processed into multiple mature peptides. These peptides stimulate adenylate cyclase and increase cyclic adenosine monophosphate (cAMP) levels, resulting in the transcriptional activation of target genes. The products of this gene are key mediators of neuroendocrine stress responses. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Feb 2013]
